

Shù Jewellery

Ring Size Chart

To ensure the most accurate fit, please print this guide at 100% scale on an A4 (21 x 29.7 cm) page.

You can check that the guide has printed correctly by placing a credit card against the outline provided. The card should align closely with the edges.

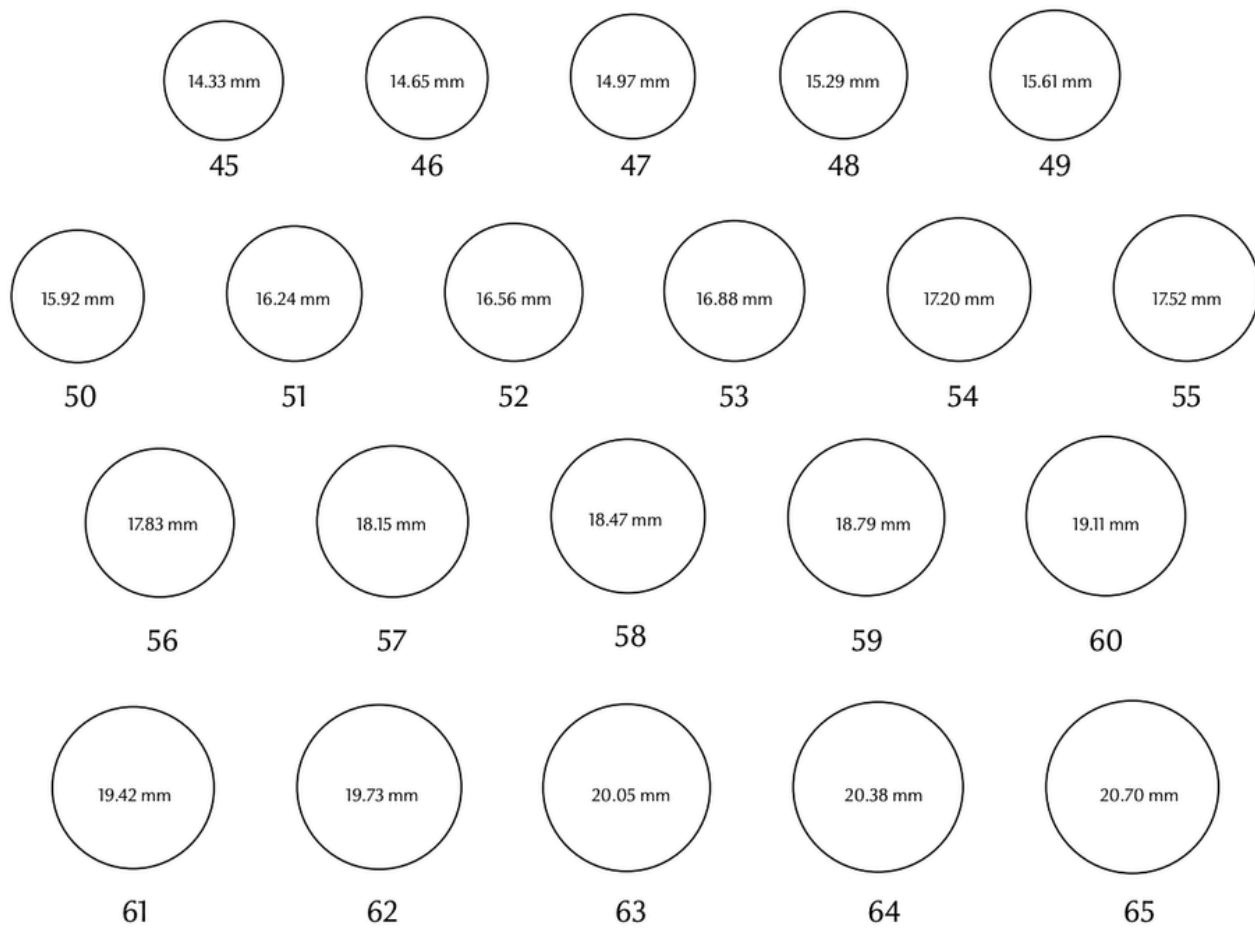

Place Credit Card Here

If you already own a ring that fits comfortably, place it over the circles below and match the inside edge of your ring to the closest size.

If your size falls between two measurements, we recommend choosing the larger size for a more comfortable fit.

As fingers naturally change slightly throughout the day depending on temperature and time, we suggest measuring at room temperature for the best result.

If you need any assistance selecting your size, please feel free to contact us at info@shujewellery.com
